JAMES LIN

COMMERCIAL REAL ESTATE ASSOCIATE BROKER | AI & PROPTECH

240-644-2316 | silversnake@duck.com | Washington, DC Metro Area
Portfolio: silversnake0.github.io/jdev/ | GitHub: github.com/SilverSnake0

Commercial real estate Associate Broker with 14+ years of brokerage experience and hands-on development of AI-assisted real estate tools. Combines lease analysis, deal structuring, market research, and negotiation with practical automation and source-grounded document workflows. Brings transaction expertise and analytical judgment to evaluating real estate scenarios and AI-generated outputs.

LICENSES & CORE EXPERTISE

Associate Broker: Maryland, Washington, DC & Virginia

Commercial leasing & sales | Landlord & tenant representation | Lease economics & financial analysis | Site selection & market research | Contract negotiation | AI-assisted document analysis

PROFESSIONAL EXPERIENCE

CapStar Commercial Realty | Associate Vice President

Gaithersburg, Maryland | July 2012 – Present

- Advise retail and restaurant clients across the DMV on leasing, sales, deal structuring, financial analysis, site selection, and negotiations; represent both landlords and tenants.
- Evaluate market conditions, demographics, and competitive positioning to support client decisions. Represented clients including UPS, Dunkin Donuts, IHOP, Denny's, 99 Ranch Market, and Bonchon.
- Designed a deal-tracking and invoice automation workflow using Google Sheets and Apps Script, reducing reporting and invoice preparation from approximately 60 minutes to 10 minutes.

SELECTED REAL ESTATE & AI PROJECTS

CapStar Agent Dashboard | Brokerage Workflow Platform

- Built and deployed a centralized, role-based platform integrating CRM, LOI and form generation, lease calculators, property marketing, transaction records, and usage reporting for brokerage operations.
- Connected Google Workspace data and document workflows with agent-specific access controls, automated report generation, and administrator tools for managing users and shared resources.

AI-Assisted Contract Comparison & Transaction Evidence

- Developed PDF/DOCX workflows that compare contracts and extract transaction information, retaining source quotations and page references for agent review before applying suggested values.
- Implemented quote validation, contradiction flags, resumable extraction, and provider-failure recovery. Tested late-document change detection using a 52-page lease and a synthetic amendment.

Commercial Lease Analysis & Decision-Support Tools

- Created commercial lease schedules and calculators for cap rates, lease-versus-purchase analysis, and lease-alternative comparisons, with structured inputs and branded PDF reports.
- Integrated AI-assisted LOI prefilling with agent review, connecting document terms to calculation inputs while keeping financial assumptions and final decisions under user control.

Market Intelligence & Multi-Agent Automation

- Built business-discovery and website-research workflows using Google Places, Google Sheets, and scripting; automated intake of second-generation restaurant opportunities into searchable broker-facing records.
- Designed multi-agent workflows for research, reporting, and execution, using specialist roles, task routing, durable handoffs, and verification steps to coordinate complex business processes.

EDUCATION & PROFESSIONAL AFFILIATIONS

University of Maryland Baltimore County | B.S., Multidisciplinary Studies (STEM)

International Council of Shopping Centers (ICSC), Member | CCIM Candidate

TECHNICAL SKILLS

Python | JavaScript | Google Apps Script | SQL | Google Workspace | Excel | REST APIs | PDF processing | Prompt design | OpenClaw multi-agent orchestration
